OK. And this is the same type of data that we've been posting for a while, right?

FYI – I have a new set of community air monitoring data that goes thru July 16th. I'll be reviewing the data early next week prior to recommending posting to the LaPlace website.

Thanks, Ruben! I think I saw that update already. Do you know when the last two Spod monitors were installed?

Jennah – James Leathers (ECAD- SPODs) & I (ARD) are the technical staff leads on Denka. If you need any specific info, just ask. Below is an update from David Gray which may help you as well. -Ruben

Here is the current update.

DPE Update

We are continuing to collect our community air monitoring and chloroprene samples are being collected during COVID19. We have also posted new chloroprene data on our public website up to June 10, 2020 and will continue to post data as we receive it. <https://www.epa.gov/la/denka-air-monitoring-data-summary>

Regarding SPods, we remain in the Initial Phase and installed the last two (2) SPods on July 2, 2020 after receiving property access from DuPont. All of the six locations have SPods installed. These monitors will operate continuously and

hopefully allow us to better characterize and understand the occasional elevated chloroprene concentrations observed at our community air monitors since installation of pollution controls at Denka. As you will recall from EPA's presentation to the community in February 2020, the Initial Phase was estimated to take about 2-months after the SPods were installed. The Initial Phase includes several weeks after installation for calibration of the instruments and data in this phase will be processed and used to assess the sampling equipment performance and develop a VOC trigger concentration for canister samples and averaging period for that concentration. The Operational Phase for the SPods will follow and chloroprene data will be posted publicly.

Based on this schedule, we have temporarily extended our community air monitoring until the SPods Operational Phase is initiated. At that time, we will discontinue and remove the community air monitoring network. The SPods are expected to continue operated until about December 2020.

Fran and Steve, I'm working on updating the Denka communications plan. David Gray wants to see it by COB tomorrow. I hope to send you the draft this afternoon to look at, and I'm sure I will need you to fill in some technical info. Will you be available to review it?

thanks,
Jennah

Diane,

Can you forward me the Denka Press Message/Desk Statement that relates to ending the monitoring in September? I want to make sure that we are using the same wording/messaging in documents we are preparing. I appreciate it.

Fran
